

ADVANTAGES OF THE MIRACLE SYSTEM

INCREASE PROFITABILITY, IMPROVE YOUR REPAIR VS REPLACE RATIO, IMPROVE QUALITY, AND REDUCE MATERIAL COST.

MIRACLE SYSTEM GUARENTEE AND EXPERIENCE

When you buy a complete Miracle System A package you are buying 25 years of experience in panel repair and the guarantee that if it is repairable you can make a quality repair on any panel on any vehicle in a very short period of time. When you buy a complete A package you eliminate the need for technicians to search the shop, or use their own tools. All you need to complete a panel repair is on the two carts. Every time a technician leaves the job they waste time.

QUALITY OF TOOLS AND LONGEVITY OF THE SYSTEM

Miracle System tools are quality tools made of titanium for strength and aluminum for light weight. These tools have been in shops for over 20 years in there present form. There are very few parts to ware out so it is likely you will have them forever. This puts the cost of a full Miracle System at less than \$100 per month.

LOWER THE OVERALL ESTIMATE

By fixing the part with the Miracle system you can lower the overall estimate. This is a great advantage over your competition, who is unable to repair the part or may use all the allowed time making the repair because they do not have the correct tools. By eliminating the cost of the part you will be more attractive to your customer whether it is the owner of the vehicle who is paying or the insurance companies.

REDUCE CYCLE TIMES

The wait times on some parts may be a few weeks depending on manufacturer, your location, back orders etc. On older models the part may simply not be available any more.

ELIMINATE PARTS ORDERING PROCESS

By fixing the part you no longer have to identify, find, order, pay for, wait, receive, inspect, (sometimes fix), inventory and install the new part. You can start the repair right away. Cycle time is decreased. Rental car times are reduced. Customer satisfaction is increased. By reducing these activities within the parts department may mean not having to hire more parts staff. *What is the true cost of sourcing a replacement panel?*

IMPROVE YOUR REPAIR VS REPLACE RATIO

Replacing a part often means using a used part that must be drilled off a section of a vehicle that is delivered by the scrap yard. This is wasted labor that could have been invested in repairing the damage. The quarter or half a vehicle that you get takes up room in your shop is difficult to move around and must be disposed of once the part is removed.

REDUCE THE NUMBER OF WRITE OFFS

On a border line write off you may be able to save the job by repairing a part rather than replacing a part. This means more work and more profit for the shop.

DO A LESS INTRUSIVE REPAIR

By fixing the part you maintain the factory welds and the structural integrity of the vehicle. Compared with conventional repair methods, less filler is used and the damage area is reduced. Show your customer their vehicle with the quarter panel removed verses a quality repair with Miracle System. What do you think they would prefer.

“The only thing better than new is original”

REDUCE SUB LET OPERATIONS LIKE GLASS

By fixing the part with Miracle System you may not need to remove the interior or the glass as it is an external repair method.

Consider removing trim panels that your technicians are unfamiliar with, This always takes longer.

THE MATH

In many instances you can negotiate more hours to repair than you would do to replace but you can always do the repair in less than half the time.

Parts sales are not as profitable as labor hours.

If you save 4 hours per week @ \$50 per hour you make \$200 per week, \$800 per month. ROI is 28 months.

You can lease the system for \$500 per month putting \$300 in you pocket.
